Projects

Thaagam.org (thaagam.org / Website & Dashboard)

Developed a donation platform with 15+ categories for contributions, integrating RazorPay & Easebuzz for secure transactions. Built an internal dashboard for efficient data management and real-time donation tracking. A field team portal allows daily service list management and media uploads, enhancing transparency with donors.

Lotels Residency (lotels.in)

Created a room booking website enabling clients to check availability and make reservations. Developed a dashboard for management to update room details, pricing, and promotions, as well as analyze booking trends. Data is stored securely for streamlined access.

A Custom Song (acustomsong.com)

Built a platform allowing clients to create personalized songs with their lyrics. Implemented a duration-based pricing model and secure payments. Developed an admin dashboard for tracking song requests, client data, and payments.

Karunai Karangal India (karunaikarangalindia.org)

Developed a donation platform for Karunai Karangal India with a unique design. Integrated secure payment gateways and an admin dashboard to manage donations and donor data, improving engagement and efficiency.

Tulu World Foundation (tuluworld.org.in)

Created a fundraising website focused on Tulu culture, with an easy donation system and admin dashboard for managing donor data. Added features to engage visitors and promote cultural awareness.

JJ Borewells (jjborewell.com)

Built a business website for JJ Borewells with location-based service search and a contact form. An admin dashboard enables real-time access to client requests and supports lead management for efficient follow-ups.

Shilpa Garden (drshubacharleswellnesscenter.com)

Developed a website for Dr. Shuba Charles Wellness Center, showcasing nature-inspired experiences. Highlighted features include pet-friendly amenities, scenic views, and health-conscious dining. Integrated booking and inquiry forms for seamless user interaction.
